

Design Data
<p>Description: The saddle is a metal shield formed to a 180 degree arc, designed to protect pipe insulation from damage and crushing at the hanger locations.</p> <p>Materials of Construction: The saddles are manufactured from carbon steel with a G90 galvanized finish. Stainless steel available upon request</p> <p>Applications: Designed for used with medium and low compressive strength pipe insulations. Ideal for use with temperatures ranging from -120 degrees to +500 degrees</p> <p>Size Recommendations: Pipe insulation thicknesses vary, so the radius of the saddle must be verified before installation to insure the proper size is used. <u>See Sizing Chart</u></p> <p>Metal Gauge: Saddles are available in 16, 18, 20, 22, and 24, metal gauge</p>

The load ratings represent average values obtained in accordance with accepted methods and are subject to normal manufacturing variations

- Dimensions and ratings are subject to change without notice -

For Use On: Steam - Chilled Water - Domestic Cold - Domestic Hot - Hot Water Heating

Design Features
Compact - Easy Installation - Minimizes Heat-loss and/or Condensation
